Notice to Readers: The Louisiana Environmental Update is published 4 times each year by the State of Louisiana, Department of Environmental Quality, to provide news and information of interest to the residents of Louisiana. Upon request, individuals or groups with 25 or more members will be placed on the mailing list of the Louisiana Environmental Update. If you wish to receive copies of this publication by mail, please contact the Communications Section at (225) 219-3960 or e-mail or write to the addresses provided above.

# Message From the Secretary

T is an honor to have been selected by Governor Blanco to serve as Secretary of the Louisiana Department of Environmental Quality. I have worked with DEQ for over 15 years as a consultant representing private interests and local governments, as a contractor assisting with air quality planning, and as an Assistant Secretary (Air Quality and Radiation Protection, 1988-1992). I know how important this agency is to the quality of life of all Louisianians, and I understand the challenges it faces in striking a judicious balance between protection of the environment and the economic well being of the state.

I accepted the appointment as Secretary with the intent to see DEQ become a trusted and respected steward of the state's environment, and an agency where employees are proud to work. In the past, DEQ has had many notable accomplishments and, along the way, a few problems. Today, the agency has new headquarters, good resources and a great workforce. To move the agency forward and to realize what I see as its full potential, we will focus on the following areas: ethics and integrity; transparency (openness); customer service; communications (internal and external); good management practices; technical excellence; innovation; and teamwork or collaboration. And, as with any successful organization, we will strive to continually improve.

This, my first message to the Environmental Update, comes only a couple of weeks after my

appointment. I know there is presently a lot of interest in the ultimate makeup of the Executive Staff appointees. I expect that decisions and announcements will be made over the next several weeks. Two of my top prior-

Mike McDaniel, Secretary Louisiana Department of Environmental Quality

ities at this time are (1) to put a good executive staff together around me, and (2) to effect the transition to the new administration with a minimum of disruption to the agency's ongoing activities.

In early February, I toured the facilities at headquarters and met many of the DEQ staff. Aside from aching feet, I felt really good about what I saw. I was very impressed with the staff and with the Department's supporting resources. I hope to get out to visit our regional offices and meet our employees there over the coming weeks.

In closing, I would like to thank the staff of DEQ and my many friends throughout the state for the strong support and good will I have enjoyed with my appointment.

I'd also like to take this opportunity to acknowledge Dr. Hall Bohlinger's tenure as DEQ Secretary and the many important efforts he initiated to improve the agency.

### Meeting His Staff

ew DEQ Secretary Mike McDaniel took Friday afternoon of his first week at work to meet the employees of DEQ.

In a walking tour of the 10 floors that house DEQ, Secretary McDaniel shook hands with employees, asked questions and generally got the feel of the building. Employees were surprised and happy about meeting the new "boss."

Public Records, the legal library, the library and Geographic Information Systems (GIS) were of special interest to McDaniel since these are areas where DEQ provides public service to citizens.

"It was nice to meet everyone and see employees working hard," McDaniel said. "It was good to see what people do and what takes place on each floor. I appreciate everyone taking time to meet with me."

# **New Faces at DEQ**

overnor Kathleen Babineaux Blanco recently appointed Karen Gautreaux as Deputy Secretary and Cyril "Cy" Buchert, Jr. as Undersecretary at DEQ.

Gautreaux is currently the chairperson for the Louisiana Coastal Wetlands Authority and represents Louisiana on the Coastal Wetlands Planning Protection and Restoration Act. Since 1992, she has held three different positions within the Office of the Governor, dealing mainly with coastal activities and environmental policy. Most recently, she was Director of the Governor's Office of Coastal Activities where she was in charge of policy and planning

coordination of the state's coastal restoration and conservation program.

Gautreaux, who earned her Bachelor of Science

in Finance from LSU, also served as chairperson for the Ground Water Management Commission, the Ground Water Management Advisory Task Force and the Governor's Advisory Water Policy Task Force.

Buchert, most recently, served as Assistant to the Governor for Finance Technology and Administration. From 1998-2001, he served as Undersecretary of the Department of Labor, managing a \$225 million budget. Buchert also served as undersecretary at DEQ from 1988-1991 and the Department of Revenue from 1996-1998.

"I am glad to be returning to DEQ to work with some of the nicest people in state government and to assist Dr. McDaniel in accomplishing his goals for the department," Buchert said.

Buchert, who earned his Bachelor of Science and Master of Science in Industrial Engineering from LSU, has 23 years of state service and seven years of private sector work experience that includes audit, finance and operations analysis experience. He served four years in the U.S. Air Force and currently serves on LSU's Industrial and Manufacturing Systems Engineering Advisory Board.

Karen Gautreaux, Deputy Secretary

Cy Buchert, Undersecretary, Office of Management and Finance.

## Thank You

s I leave my position as DEQ Secretary, I would like to thank  $oldsymbol{A}$ all the employees of DEQ for their effort and dedication. Because of their hard work, the department was able to make many positive strides in the last year. I know there will be many more accomplishments in the future.

Congratulations to the Office of Environmental Services for completing the EPA's requirements for issuing water permits. In 2003, the department was required to issue permit decisions on 35 major and 300 minor facilities. The agency topped that goal by issuing coverage on 36 major and 382 minor facilities. This is a tremendous

Hall Bohlinger

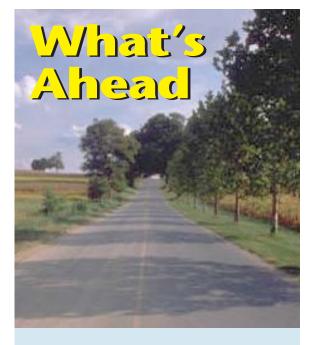

accomplishment for the agency and shows the dedication employees have to succeed. The EPA also recognized the department's efforts to reach several other goals during the required

The Office of Management and Finance aggressively audited participants in the waste tire program. With hard work and determination, this office recovered more than \$1.15 million in overcharges to the program.

The Office of Environmental Assessment deserves praise as well for its part in helping ExxonMobil Baton Rouge Plastics Plant receive the state's first Ready for Reuse determination. The goal is to continue this type of success at other Ready for Reuse sites throughout the state. The second site was declared in early March. EPA and DEQ officials participated

The Office of Environmental Compliance did its part to insure success. They issued a total of 1,830 enforcement actions in 2003. DEQ collected \$437,355 in penalties, \$2.9 million in settlements and \$8.4 million in beneficial environmental projects. A portion of the BEP money will go to new air monitors that are earmarked for use in the five-parish non-attainment area, as well as many other projects that are sure to help the environmental concerns of Louisiana citizens.

Thanks, again, to the staff that realized the agency's mission and helped to make 2003 a great year. Because of this commitment, my tenure as Secretary was productive and meaningful. There are too many success stories to list in this small space, but DEQ should be proud of all it accomplished. I know the DEQ staff will continue to work hard and make the new Secretary, Mike McDaniel, proud to be associated with the department.

Taking the high road to protect Louisiana's air, land, and water is a continuous and longterm process. The role DEQ plays in achieving this measure requires hard work, commitment and dedication by our staff. Each new day, month and year brings with it hope for progress and change. We welcome 2004, and we are optimistic that the strides the agency has made will continue and multiply.

The environmental future of Louisiana looks bright. The quality of life and the environment for citizens living in Louisiana is improving.

The Agency has taken a series of successful steps forward building on previous experiences and lessons learned. Persistence will be crucial this year. Establishing, maintaining, and building sound environmental programs and quality initiatives will be our platform. Our goal is developing and finding the best approaches to resolve environmental concerns.

DEQ offers and is involved in a variety of outreach and educational programs that help transform communities. If there is an event that you would like to attend, then mark your calendars!

# Cooperation is the Key

### Corrective Action Study Begins at Bayou d'Inde Site

EQ, PPG Industries and CITGO Petroleum Corporation recently signed a Cooperative Agreement that will lead to a Corrective Action Study for the Calcasieu Estuary Bayou d'Inde Site. The study will evaluate remedial options and develop proposed integrated site-specific remediation standards for the waterbody. It is another step forward toward the process of resolving any ecological risk and human health concerns

process of resolving any ecological risk and human health concerns associated with Bayou d'Inde. Protecting and improving this estuary is important to the citizens of the parish and the state.

Bayou d'Inde is more than nine miles long and is located in the northern portion of the Calcasieu Estuary, west of Lake Charles. Its

northern portion of the Calcasieu Estuary, west of Lake Charles. Its headwaters originate in the western portion of Sulphur, near the Interstate 10 Bridge. Bayou d'Inde flows primarily east-southeast and empties into the Calcasieu River Ship Channel southwest of Coon Island.

EPA conducted an extensive remedial investigation study to delineate the extent of contamination within the estuary. Based on their findings, DEQ would act as the lead agency for the Bayou d'Inde and Indian Marais Lagoon. DEQ will oversee the study, evaluate proposed remedial standards and encourage public participation throughout the process.

DEQ conducted a press briefing in Lake Charles to inform elected officials, media and the public of this notable event in Bayou d'Inde history. Dr. James Brent, Assistant Secretary for the Office of Environmental Assessment, said, "This successful milestone is the result of the combined efforts of the agency, PPG, and CITGO and that makes this cooperative agreement very significant."

Environmental Assessment, addresses officials at the cooperative agreement signing

operative agreement signing for the Calcasieu Estuary Bayou d'Inde site.

# **Ready for Reuse**

### ExxonMobil Plastics Plants Receives Determination

n December, DEQ and EPA honored the ExxonMobil Chemical Company's Baton Rouge Plastics Plant with the first "Ready for Reuse" determination in the state of Louisiana. DEQ and EPA agree that the ExxonMobil Chemical Company's Baton Rouge Plastics Plant facility has successfully completed its site-wide investigation and have made a technical determination that the property is now Ready for Reuse. Several state and

locally elected officials attended the event.

"Ready for Reuse" is a new measure of success among EPA's cleanup programs, and is a key component of their National Land Revitalization Initiative. The goal of this initiative is to make land revitalization and reuse a fundamental element of all EPA and state cleanup programs to help foster economic development and return previously contaminated or abandoned properties back to productive use.

EPA Multimedia Planning and Permitting Division Director Carl Edlund was one of the speakers at the event. "Today's announcement highlights our newest program to promote the reuse of formerly used industrial properties," he said. "We are building on our experience using the enormously successful brownfields program. Our 'Ready for Reuse' determinations clear the way for reuse of valuable natural resources by providing necessary encouragement and assurances to developers."

The "Ready for Reuse" determination verifies that the environmental conditions at the 118-acre site are protective of human health and the environment based on its current use and anticipated future use as a commercial/industrial property. Some of the products produced at the site include ethylene, vinyl acetate, and various co-monomers and modifiers to produce low-density polyethylene. End products produced from this polyethyl-

ene include plastic films, molding adhesives, compounding and oil additives.

A "Ready for Reuse" determination also recognizes when contamination on a property has been evaluated and cleaned to the extent that the property is safe based on its current or planned future use. It provides specific information about each site, including the nature and extent of contamination, the cleanup work performed (if needed) and the status of the property with respect to state and

federal requirements.

duced from plastics manufactured

at the ExxonMobil Plastics Plant in

Baton Rouge.

tissue and Post-it notes are some

DEQ Secretary Hall Bohlinger stated during his remarks, "We are extremely pleased with the hard work and initiative by all parties to reach this milestone. Our goal is to replicate the success of this site and continue this precedent with other facilities across the state." The agency is currently working on other exciting "Ready for Reuse" projects, and has made it an integral part of its cleanup programs.

Ray Sturdivant, Eagle Environmental Services Incorporated consultant; Doug Bradford, DEQ Geologist Supervisor; Dennis Piper, DEQ Team Leader; Jared Meyeux, Eagle Environmental Services Incorporated consultant, and Pat A. Currasco, ExxonMobil Senior Environmental Coordinator.

# **A Step for Environmental Education**

### The Lobos Greater Baton Rouge Industrial Show

In November 2003, staff of the DEQ took another step to make environmental information more accessible to the public. Educating the citizens of our state on environmental issues is an important function of DEQ and finding the right venue to do that is a challenge.

At the Lobos Greater Baton Rouge Industrial Show at the Lamar Dixon Exhibition Center, DEQ staff members presented eight seminars for the public. Professional Development Hours (PDH) for Professional Engineers were given for each seminar. The well-attended seminars offered a wide variety of environmental topics. They were:

 Best Practices in the Retention of Email Records presented by Wendy McLain, Public Records Manager

Laurie Blandino, Records Management, Dina Heidar and John Rogers, Recycling, set up DEQ exhibits at the Greater Baton Rouge Industrial Show at the Lamar-Dixon Expo Center.

- Watershed Planning and Non Point Source Implementation presented by Jan Boydstun, Supervisor of the Non Point Source Group
- Louisiana Brownsfields and Voluntary Remediation Program presented by Roger Gingles, DEQ Brownsfields Coordinator
- Resource Conservation Challenge presented by John Rogers, Recycling and Littler Section
- Managing Louisiana's Surface Waters presented by Dugan Sabins, Environmental Scientist Senior and Al Hindrichs, Environmental Scientist Staff
- Louisiana DEQ Notification Requirements presented by Jeffrey Meyers, Environmental Manager
- Review of Criteria Air Pollutants in Louisiana presented by Jim Orgeron, Environmental Scientist Staff
- Conducting an In-House Waste Audit by John Rogers, Recycling

A survey taken after the seminars resulted in positive feedback. One participant wrote "The speakers were very informative; please convey my appreciation to them for an excellent job. I believe that these seminars break down the imaginary walls that people put up between EPA/DEQ and the rest of the world."

Another respondent wrote, "The people giving the seminars were to a man/woman quite edu-

> cated, articulate and each had a flair for presentation. They took questions kindly and were able to dispense good advice."

credit was given for the semi-

nars DEQ presented.

DEQ had two booths for display in the exhibition center and got good response from the public and other exhibitors. The booths and the seminars gave the professionals at DEQ a chance to interact with the public and provide them with valuable environmental information and education.

# **DEQ'S Public Participation Group**

ower point presentations, list servers, a more accessible website and a public hearing survey are all innovative new components of the DEQ's forward looking plan to better serve the public. While public notices and public hearings are required of DEQ, sometimes getting the information to the average citizens can be a daunting task. The job of informing the public falls to DEQ's Public Participation Group (PPG). The purpose of the new procedures is to make information sharing easier for both the public and DEQ.

Public hearings, generally held for comment on draft/proposed permits or technically complete applications for the different media (air, hazardous

Setting up the power point presentation at a public hearing in Bell Chasse are Brian Smith and Nathan Levy, Office of Environmental Services.

waste, solid waste and water), can be confusing and complicated to the average person. Each hearing follows a form prescribed by regulations that includes the order of speakers, protocol and time limits. To facilitate the flow of this information to citizens attending the hearing, the PPG is now using a power point presentation that gives that information continually throughout the hearing. The presentation includes the form of the hearing, contact points and locations where the public can view the applications and other pertinent information. These presentations are a user-friendly way to get the information out to the public.

A list server, set up through the Office of Electronic Services in the Division Of Administration (DOA), allows the public to receive public notices in a new way.

"People can subscribe on their own, receive state and parish notices and can take themselves off the list" said Soumaya Ghosn, environmental scientist supervisor of the PPG.

Those who wish to still receive a hard copy of the notices may do so. A citizen must request their name be taken off the mailing list or it will remain there.

PPG is already in the process of setting up a special website location so that citizens can view information online. This will mean that they won't have to come to DEQ, the library or other locations to view the documents.

Since DEQ is constantly striving to improve its service to the public, a public hearing survey, distributed at each public hearing, will give the public

Calvin Fair and Laura Ambeau, Public Participation Group, assist citizens with information and signing in at a public hearing in Belle Chasse.

a chance to comment on the public hearing process. The survey will provide DEQ with information that will help improve the quality of our hearings and better serve the community.

If you would like to receive Permit Public Notices by email, you can subscribe to the DEQ public notice list servers at <a href="www.state.la.us/ldbc/listserverpage/ldeq\_pn\_listserv.htm">www.state.la.us/ldbc/listserverpage/ldeq\_pn\_listserv.htm</a>. To review public notices on the DEQ web page go to <a href="www.deq.state.la.us/news/pubnotice">www.deq.state.la.us/news/pubnotice</a>.

To be added to or removed from the public notice mailing list or to receive hard copies of the public notices, call 225-219-3276; fax 225-219-3309 or email *maillistrequest@ldeq.org*. You may also mail your request to Soumaya Ghosn, P. O. Box 4313, Baton Rouge, LA 70821.

### **Madisonville Wooden Boat Festival**

adisonville draws people from all over Louisiana for the unique and interesting Wooden Boat Festival. Thousands descend on this small town on the Tchefuncte River to see "old restored wooden boats ranging from 10 foot' prams to large yachts, oyster luggers, Chris Craft runabouts and more," said Don Brandin of the Southeast Regional Office (SERO) of the DEO.

Don Brandin and staff from SERO set up the DEQ booth at the Madisonville Wooden Boat Festival in Madisonville.

Don, Mike Algero, John Calvin, John Dardar and Johnell Elmer, all of SERO, set up and manned the DEQ booth at the festival. Many festival visitors stopped by to see what DEQ offered... They "asked many questions concerning pollution in the rivers, mercury contamination in fish, litter, air problems, disposal of household hazardous waste, home sewage systems and many other issues," Don said.

The festival continued throughout the weekend, despite the threat of rain, and visitors to the booth took home bumper stickers, brochures and other educational and informative items that DEQ

"The highlight of the fest was the `quick and dirty boat building' in which a group of entrants all get the same raw materials to build a boat" (from Saturday morning to Sunday noon), Don said. When the boats are placed in the Tchefuncte River to be raced "many of the boats come apart and sink, so it's a hoot to watch."

Providing the public with important environmental information, answering questions and being available where citizens gather is an example of DEQ's commitment to outreach.

John Calvin, Environmental Scientist SERO, waits to answer questions and give out information about DEQ and the environment at the Madisonville Wooden Boat Festival.

Take a Trolley Trip

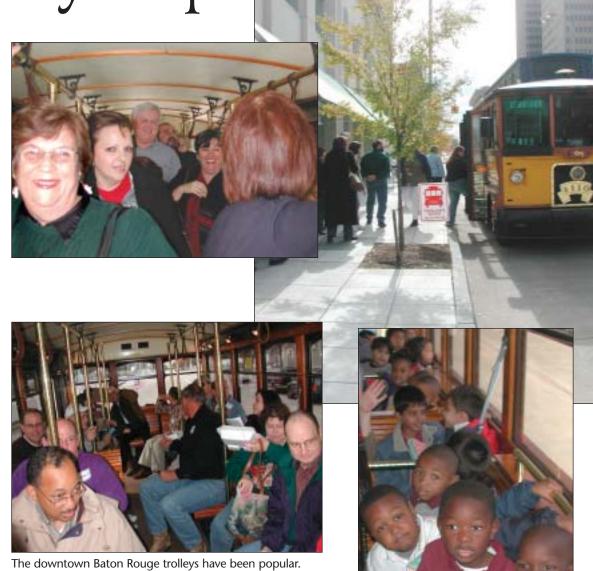

ave you seen the natural gas burning trolleys that loop downtown Baton Rouge? You can't miss them, the red streetcar-style trolleys run approximately every six minutes between 10:30 am - 2:30 pm each weekday.

The free shuttle is intended to make getting around downtown convenient and hassle-free. While at the same time these new trolleys provide air quality benefits through the use of cleaner burning fuel and the reduction of vehicle traffic in the downtown area. Although not true in Baton Rouge, motor vehicles are the single largest source of air pollution in many cities across the United States. The trolley service is the first mass transit program in the state to operate on clean natural gas.

So, exactly what is natural gas and why is it important? Natural gas is colorless, shapeless and odorless in its pure form. It is a combustible mixture of hydrocarbon gases, and when burned it gives off a great deal of energy. Natural gas is an extremely important source of energy for reducing pollution and maintaining a clean and healthy envi-

The trolleys are part of the Capitol Park Interpretive Plan, which is designed to turn the park area into a tourist-friendly campus. The trolleys serve 18 stops in downtown Baton Rouge. Citizens who find themselves in the area are encouraged to utilize the service when visiting shops, restaurants, governmental buildings, cultural exhibits and educational activities. Whether you're a citizen, state employee or a student participating in a school field trip, take advantage of this service that is good for both the environment and commu-

If you would like information about the trolley route visit http://brgov.com/Dept/DDD/trolley.htm

# A Day in the Life...

### DEQ's Recycle Guy

ohn Rogers brings many talents and much expertise to his job at the DEQ. John, who is a Staff Environmental Scientist II in the Recycling and Litter Section, has a Bachelor of Arts and MSW in social work and a Master of Science in Environmental Science. He has worked for the state since 1980 and for DEQ Recycling since 1990. When the State Legislature enacted the State Recycling and Waste Reduction Act, it created recycling in Baton Rouge and a full- time job for John.

John's job has evolved over the years as recycling has become more accepted and the technology has progressed. "The public is more educated and sophisticated and we are seeing more citizen interest and input," John said. "My primary client is local government, but I get a lot of calls from the public and industry too. Actually, our clients are anyone who produces a waste stream," and that includes industry, businesses and private citizens.

"One of the things we have learned about recycling is that all of the programs are interrelated and encompass things not normally thought of as recycling," John said.

"Greenhouse gas reduction – the reduction of methane is a recycling issue. Landfills are required to recover the gas they produce and that helps the atmosphere."

Industry perception of recycling has also changed with the times. "Now, plant managers think 'being green' is just part of doing business," John continued. "Technology is changing throughout the environmental arena, not just in recycling. The thinking now is waste minimization or how can I avoid producing waste at all or make the waste into saleable products."

The major goals of John's section are to find solutions for waste reduction and to educate people about recycling. There are two different sides to these goals. The formal side deals with waste reduction, annual recycling reports and composting. The less formal, or fun, side is educating the

John Rogers

public. Teaching includes workshops, classroom demonstrations, working with the web page, Household Hazardous Materials Day, Earth Day, and having booths as such events as Ocean Commotion, Hunting and Fishing Day and conferences and shows. These are all opportunities to present the programs that DEQ sponsors and to spread the word about recycling.

"We have an expanded target audience," John said. "We speak to teachers, producers and consumers. We encourage consumers to buy recycled products. It is important for us not to narrow our range, to be flexible and to respond to the public."

John receives many calls from the public and the Recycling Section frequently refers them to the local recycling offices of city and parish. People call when they have problem materials like old gasoline in a boat motor. John gives his callers the options for disposing of their materials or refers them to someone that can help.

"The most common call I get usually starts with – my husband (father, uncle, neighbor) recently passed away and we have been cleaning out the shed (workshop, house) and we found...usually it's something unknown, Freon, pesticides, paint or other materials not readily disposed of," John said. "We refer those people to knowledgeable people or disposal contractors registered with DEQ. I had the wife of a pharmacist call and she had found brown bottles of medicines in the garage and didn't know what to do. I refereed her to the pharmacy board because only another pharmacist would know what was in the bottles."

DEQ's approach to recycling has changed, just as technology and information have changed. The public has "higher expectations of solutions," John said. "Citizens are generally more environmentally conscious. They realize that we deal in multi-media (air, water, hazardous and solid waste issues) and that everything we do is interrelated. DEQ and

local governments help to educate and inform the public so that they can help themselves.

"We get calls today that we would not have gotten 10 years ago," John said. "A lot of what we do is filter requests and direct the caller to whomever can best help them. It is important to know what the issues and functions of the various departments in DEQ are. The public has a right to ask questions and to question what we do. They also have a right to access information and participate in the process."

John is a multi-faceted professional. A Commander in the Naval Reserve, he joined the Navy as a "white hat, cracker jack box sailor" in 1967. He only has a few more years until he retires. He gets "great pleasure" out of playing his musical instruments. John plays alto sax in the Baton Rouge Concert Band and oboe in his church orchestra. He referees soccer matches and recently went to the Woman's World Cup in Los Angeles as a volunteer in media relations. John learned new things about media relationships and brought some transferable ideas and skills back to DEQ.

When asked what he liked best about his job, John was quick to answer, "The People – I get to meet a lot of people and the job is ever changing. It gives me a great sense of accomplishment."

John Rogers, Recycling Section, speaks to group of professional engineers at the LOBO Greater Baton Rouge Industrial Show, about the benefits of an in-house waste audit

# Criminal Investigation Section takes the message to the public

ducating the public about how they can recognize environmental crime is just one of the jobs of Peter Ricca, Environment Manager of the Criminal Investigation Section of the DEQ. Ricca recently spoke to a group at the LA Conference in Water Supply, Sewerage and Industrial Waste for the Southwest Region in Lafayette, Louisiana. The group, many of whom are water and sewerage inspectors and in a position to inspect and observe illegal dumping, were asked to be "eyes and ears" for DEQ. Since the public is more likely to spot environmental crime, Ricca explained what constitutes a reportable incident, what a citizens should and should not do, and the procedures for reporting the event to DEQ.

Helping citizens become more proactive and being sure that they have complete and accurate information with which to do that, is part of DEQ's continuing effort to safeguard Louisiana's environment.

Peter Ricca, CIS, presents a seminar on environmental crime at a conference in Lafayette.

Peter Ricca, CIS, speaks to a group at the LA Conference on Water Supply, Sewerage and Industrial Waste In Lafayette.

# Ocean Commotion Combines Hands On Learning and Fun

ore than 2,280 K-8th grade students, 106 teachers and 295 chaperones attended the LSU-LA Sea Grant's Ocean Commotion 2003 at the Pete Maravich Assembly Center at LSU. Hundreds of hands-on exhibits gave the children a chance to see science, work with experiments and explore the environment up close. Employees from the Office of Environmental Assessment and the recycling and litter section participated.

DEQ manned four different exhibits. Environmental Scientist Al Hindrichs' exhibit was entitled "Water Fit for a Bug." At the exhibit, Hindrichs showed different types of macroinvertebrates and taught students how these bugs can serve as water quality indicators.

John James Clark, Environmental Scientist, and Sue Smith, Environmental Scientist Supervisor, exhibited a river simulator to show natural river behavior and the natural patterns of rivers. The river simulator was built as a cooperative effort that Hindrichs and Clark did on their own time.

Jesse Means, Geologist III, and Micaela Marchand, Environmental Scientist II, of the Aquifer Evaluation and Protection Section, explained where drinking water comes from, how it can become contaminated and how to prevent contamination. As part of their demonstration they used an aquifer model and actual materials— like sand, clay and gravel — that make up an aquifer.

John Rogers, Kurt Auzenne, Dina Heidar and Leslie Garcia of the recycling section presented a game, like Jeopardy, for the kids to play. They divided the kids into two groups— the sharks and the dolphins. Then, through a power point presentation, the kids answered questions about water, air, ozone and other issues.

Pam Kimball, Recycling Section, manned the recycling and litter booth showing the kids how and what to recycle.

John Rogers and Kurt Auzenne, DEQ Recycling Section, play Environmental Jeopardy with school kids at Ocean Commotion

Pam Kimball and Judy Desselle, DEQ Recycling Section, show students the importance of recycling.

Micaela Marchand and Jesse Means, Aquifer Evaluation and Protection Section of DEQ, demonstrate how drinking water can become contaminated to school children and their teacher.

John James Clark and Sue Smith, Environmental Planning, demonstrate natural river patterns for some of the many students who attended Ocean Commotion.

### DEQ employees raised \$27,300 for the United Way

he money raised was considerably higher than the original \$23,000 goal set before the campaign, according to Karen Fisher-Brasher, 2003 campaign chairperson.

"Thanks to a phenomenal effort on the part of the United Way Committee and the support of DEQ employees, the 2003 Capital Area United Way collections topped \$27,000," Fisher-Brasher said. "This exceeded not only our goal, but our best past year. On the part of the member agencies and their clients, I want to say thank you. For your innovation, for your spirit, for your tireless efforts, for your service, for your generosity, thank you."

Organizers added some spice to this year's campaign with several fun events. Crazy hat day, a Halloween costume contest and bake sales helped create a festive atmosphere for the folks who participated and for spectators.

Secretary Hall Bohlinger and others judged the employee contests.

"The United Way is an organization that does a lot for the community," Bohlinger said. "I'm proud of the response from the DEQ employees. The contributions to the United Way shows that the DEQ takes an active role in the community. I also appreciate all the employees who participated in the fund-raisers and I was proud to be a judge in many of the activities. I want to thank all the organizers, the participants and the people who contributed to make this year's campaign a success."

# Like sands through the hourglass, so are the days of our lives.

Since inception in 1984, the mission of the agency is to provide service to the people of Louisiana through comprehensive environmental protection in order to promote and protect health, safety and welfare while considering sound policies regarding employment and economic development.

Let's spend some time sifting through the sands of the DEQ hourglass to see if that mission was met during the year 2003. The agency experienced several accomplishments, changes and notable moments. We captured highlights from the year in review and wish to reflect on the positive strides and accomplishments.

DEQ's Annual Conference on Waste and the Environment

- The agency moved to its new location, the Galvez Building, part of Capitol Park, a collection of new facilities that are being added to the historic structures situated around a campus of roughly 250 acres in downtown Baton Rouge.
- The DEQ annual conference on Waste and the Environment marked "A Quarter Century of Progress." The conference provides a forum for the exchange of information on the latest available technologies, and for continued accreditation of individuals in the environmental arena.
- Air quality was an extremely important issue facing the state as a whole. DEQ hosted it first press conference to announce how citi-

- zens could do their share for cleaner air. Research and data show that air quality in Louisiana has steadily improved in the last 30 years.
- The results of air quality data collected by DEQ showed that Louisiana is meeting new more stringent annual and 24-hour national ambient air quality standards for particulate matter set by EPA for fine particulate matter also known as PM2.5.
- Initiatives like the Great American Cleanup, Household Hazardous Waste Collection Day, Litter Abatement Program and Great Louisiana Beach Sweep and Inland Waterway Cleanup were again successful endeavors.

Household Hazardous Waste Collection Day

- DEQ was awarded more than \$800,000 in grant money from EPA for the Brownfields Program and hosted its first brownfields pilot workshop. Brownfields are defined as real property, abandoned, idled or underused industrial and commercial facilities where expansion, redevelopment or reuse is complicated by the actual, perceived or potential presence of a hazardous substance, pollutant or contaminant. The goal of the Brownfields Initiative is to turn those properties back into productive use.
- Geographic Information System unveiled Make-A-Map. This announcement made DEQ the first state environmental agency in the country to provide seamless high-resolution statewide digital orthoimagery map-making

# Review

03

Air Quality is improving in Louisiana

Society of Environmental Journalist Conference

technology to the general public. The Make-A-Map web application provides access to historical geographic and environmental data sets from throughout the state and enables the public to obtain a visual understanding of their immediate surroundings.

• The Drinking Water Protection Team kicked off an aggressive pilot program geared at public awareness. The campaign was launched in Avoyelles Parish. A combination of outreach methods was used to garner public interest, awareness and attendance at a series of community meetings. Geared at educating the public on how to protect their sources of drinking water. The theme of the campaign was "Protect Your Water One Drop at a Time."

 The Gulf Guardian Awards yielded yet more winners from Louisiana. Dr. Nancy Rabalais, from Chauvin won first prize in the individual category for Nutrient Enrichment and Habitat. Louisiana Sea Grant College Program in Baton Rouge won second place in the youth education category for the Coastal Roots: School Seedling Nursery Program for Wetland Restoration. The U.S. Corp of Engineers New Orleans District (Operations Division) won second place in the partnership category for the Mississippi River Delta Region Project. CheveronTexaco, Deepwater Business Unit, New Orleans, won third place in the partnership category for the Gulf Safety Committee. As a partner with the Gulf of Mexico Program, DEQ encourages Louisiana residents to nominate private citizens, businesses, groups or organizations that take pos-

Brownfields Program first pilot workshop

itive steps to keep the Gulf of Mexico and associated coastal water habitats healthy, beautiful and productive.

- DEQ hosted the first joint workshop on the Master Farmer Program. The Master Farmer Program is a cooperative effort aimed at demonstrating that agricultural producers can, and will voluntarily reduce the impact that agricultural production has on our state's environment, especially our surface waters.
- The Communications Section, for the first time, participated in the annual Society of Environmental Journalist Conference. They have aggressively worked to define and improve the image, reputation and credibility of the agency with respect to the media and public perception.

# **DEQ News Clips**

Army Spec. 4 Don L. McCastle of Baker had his picture taken with President George Bush when Bush was in Iraq for "Thanksgiving dinner." McCastle is the grandson of Admon McCastle, DEQ's Community and Industry representative. The younger McCastle had a chance to visit with the president and asked how Bush knew so much about Louisiana cooking.

A fire at the former state Education and Natural Resources building, located on opposite corners of North and North Fourth streets, called for an evacuation of the Galvez Building and others buildings located in close proximity in the downtown area. The fire was DEQ's first opportunity to implement its emergency evacuation procedures.

# **LaELP Membership Meeting**

all Bohlinger, who was then Secretary of DEQ, welcomed industry leaders and interested parties, to the Louisiana Environmental Leadership Program's (LaELP) Annual Membership meeting.

"Periodically, we invite the recipients of the Governor's Leadership Awards to meet with us and describe their facility's award-winning projects," Bohlinger said. "We also invited representatives of

Dr. Charles Killebrew, DEQ Environmental Supervisor, speaks to the group of LaELP members assembled for the membership meeting.

EPA's Region 6 office to discuss their National Waste Minimization Partnership Program under its Resource Conservation Challenge (RCC). This initiative is aimed at reducing hazardous waste nationwide through voluntary partnerships between industry and government. The RCC initiative is similar to our state Leadership Program in a number of ways. Perhaps the most important similarity is that both voluntary programs need the support of leaders like you to be successful. At DEQ, we are committed to such cooperative, voluntary initiatives that offer opportunities for improving the quality of the state's environment."

David Bathel, Chevron Oronite Company – Oak Point Plant, Fred Goodson, Motiva Enterprises – Norco Refinery and Keith Bourque, Conoco Phillips – Alliance Refinery, presented summaries of their award winning LaELP projects to the group.

Guest speaker, Kathleen Aisling, EPA Region 6 presented a talk about the programs that they sponsor. "The Resource Conservation Challenge is a major multimedia effort to find flexible, yet more protective ways to conserve our valuable resources through waste reduction and energy recovery," Aisling said. The goals of the program are to protect the environment and reduce risk, assist states in promoting waste minimization, remove regula-

tory hurdles, address issues outside of the regulatory authority and establish a core program in each state.

The afternoon session included representatives from industry discussing projects that may qualify for the Waste Minimization Partnership with EPA. Dr. James Brent, Assistant Secretary of DEQ Office of Environmental Assessment, wrapped up the program with discussion and remarks.

# **DEQ Tackles Air Quality**

ir quality issues in the five-parish nonattainment area and throughout the state have been in the spotlight lately at the DEQ.

In early fall, DEQ formed the Highly Reactive Volatile Organic Compound (HRVOC) Workgroup to assess the correlation between highly reactive hydrocarbons and the ozone in the nonattainment area. The workgroup, which consists of members from DEQ, industry, government and environmental organizations, met for the first time on Oct. 6, 2003. The participants agreed upon the schedule, objectives and scope of services. A brainstorming session gave members a chance for input on the future agenda and priorities.

Bob Hannah, DEQ Deputy Secretary, said that the group would remain focused on the HRVOC problems and the ozone spikes recorded during the 2002-2003 ozone season.

"We are very proud of the team." Hannah said. "We wait for their recommendations, some of which DEQ will be able to fulfill and some which will be better completed by the private sector."

Bob Hannah, former DEQ Deputy Secretary, explains the problems to the audience consisting of DEQ staff, industry representatives and environmental organization members and citizens.

Core members of the workgroup from DEQ are Maurice Oubre, chairman, Jim Hazlett, Manop Vanichchagorn, Jennifer Walton, Vivian Aucoin and Jim Orgeron. Core members from the public are Mike McDaniel, now DEQ Secretary and formerly with McDaniel and Associates and Baton Rouge Clean Air Coalition; Henry Graham, Louisiana Chemical Association; Gary Miller, Louisiana Environmental Action Network; Richard Metcalf, Louisiana Mid Continent Oil and Gas Association; Chad Scott, Louisiana Association of Waterways; and Maria Martinez from EPA Region 6.

Our objective is "a better understanding of the causes of ozone exceedances, especially the effect of HRVOC, in order to help identify cost-effective solutions for reducing ozone and protecting public health," Oubre said.

To facilitate the process, the larger group was organized into three subgroups, each with different responsibilities. Subgroup one will study ozone exceedances/VOC data analysis. Subgroup two's task is emissions and meteorology monitoring and subgroup three is working with emissions inventory.

"Each group is working on activities and will eventually come up with action items that will be performed by the subgroup or by a contractor," Oubre said. "For the contractor, a scope of services will be prepared for bid purposes, with the hope of issuing a contract in the first quarter of 2004."

A contractor could be used to complete activities that DEQ does not have the manpower or resources to perform. Some of those tasks might be to capture the historical, Nox, VOC, ozone and meteorological data from all sources into a database and to perform special monitoring for HRVOC.

EPA personnel are assisting with the workgroup efforts. Maria Martinez, EPA Region 6, attended the first meeting of the workgroup and said, "our man-

Maurice Oubre, Chairman of HRVOC Workgroup and Vivian Aucoin discuss issues with Richard Metcalf, Louisiana Mid-Continent Oil and Gas Association.

agement is supportive of this important effort and we, as staff, want to assist." Maria and Mark Sather are helping the HRVOC workgroup via teleconferences with the subgroups.

The HRVOC workgroup allows DEQ, industries, environmental organizations and citizens, the opportunity to be part of the solution for the five-parish nonattainment area's ozone problem.

Maria Martinez, State Implementation Plan Coordinator for EPA Region 6, attended the first meeting of the HRVOC workgroup and continues to assist via teleconference.

### **Public Announcement**

As part of the Louisiana Department of Environmental Quality's commitment to provide the latest environmental information and news along with a high quality of customer service and assistance to citizens, we are pleased to offer electronic versions of the Louisiana Environmental Update on our web page. The publication can found under the "News" tab or <a href="https://www.deg.state.la.us/news/">www.deg.state.la.us/news/</a>.

We would like to also take this opportunity to inform readers that because of this new development, the mailing list for the Louisiana Environmental Update will be revised. We are asking for your assistance. If you are an individual or company that currently receives the publication via mail and would like to continue, please return the information slip below by March 30, 2004.

We thank you for your continued support and assistance in accomplishing our mission of protecting Louisiana's people and the environment. Should you have any questions please call 225-219-3950. Thank your for time and continued readership.

Please detach and return to
